- Have experience with working with ETL.
- Experience in SQL Database design, maintenance and performance tuning, developing SQL queries/scripts, stored procedures, TSQL using SQL Server.

SIDE PROJECT:

Portfolio Website

May 2020 – Jul 2020

Description:

Built a responsive bootstrap-based portfolio website using HTML/CSS/JavaScript which provides personal information about myself and showcase all hobby projects which I have completed since college. The application has a special section for writing blogs and articles. It also has a feature to connect where the end user can directly message with their details. This website has only open doors for adding new feature and I spend my free time in upgrading the application.
